The Biggest Lie in Skateboarding: Why Hand Spin ? Bearing Oct 16, 2018 — Fast hand spin does not always result in a fast board. The idea is that if the wheel spins fast, we have a speedy ride. getting our hands on a new bearing/wheel combination is to give the wheels a hard and fast hand spin. Now go forth and tell riders everywhere: Hand spinning is virtually meaningless

Skateboard Bearings - The Truth!!! - Vandem Longboard Shop Jump to Can you take bearings out of wheels? — The #1 thing that makes you enjoy skating more is stokes you out - then you'll probably skate faster. But in our experience, spending on really good bearings doesn't really do much for your overall speed. You can visit us in Bristol, we're online 24/7 and What are the Fastest Bearings? – Motion Boardshop That being said, the brand or type of bearings you have will not determine whether still using all the necessary components that make your bearings last longer, faster than traditional bearings, they just have the ability to go faster without

how can I make my skateboard faster? : NewSkaters - Reddit What equipment upgrades do i need to make to make my skateboard go faster? how long have you been skating on your board? your bearings might need to

What can I use to get my skateboard bearings to go faster Jan 22, 2019 — First off let's start with water. Water can actually be a lubricant but this does not mean it should ever be in a bearing. Unless you are cleaning your bearings and How wheels and bearings affect speed — Skate One Forum All my bearings and wheels are still pretty close to new at this point. The harder the durometer the faster you will go on smooth park cement. which imo is the sweet spot in a world where they don't make 56mm Bombers. they don't last as long and are easier to flat spot, but they do come in small sizes
